

Pharmacy Department Policy - March 2026 Update

Document ID: PHARM-2026-03

Department: pharmacy

Document Date: 2026-03-15

Pharmacy Medication Dispensing Policy Update

This document updates the pharmacy medication dispensing policy issued on January 5, 2026.

Effective March 15, 2026, the target dispensing time for standard medication orders is reduced from 30 minutes to 20 minutes.

The updated target is intended to reduce medication delays and improve patient safety.

This document supersedes the previous 30-minute target for standard medication orders.

Urgent medication requests must continue to be handled according to clinical priority.

This is the current pharmacy dispensing target as of the effective date of this policy.
